

Resource efficiency

We help you to reduce costs and improve sustainability by improved resource efficiency

- Resource Efficiency strategies
- Indicator development
- Material audits
(the Motiva model)
- Industrial symbiosis facilitation
- Sidestream mapping and upgrading opportunity assessment

“Energy and resource use are critical to our well-being and economic activity. Use of energy and resources creates costs to the users, and affect the environment and society at large. Efficient use of energy and resources is often the best way to reduce costs and improve profitability of actions “
